REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claims are drawn to a tablet comprising fosinopril sodium as the active ingredient and zinc stearate as the lubricant. Since stearate along with calcium, and magnesium stearate are seen as equal in the art regarding the lubrication of pharmaceutical tablets, it would be expected that these lubricants behave similarly in composition. However applicant has found unexpectedly that calcium and magnesium stearate allow significantly higher degradation to the fosinopril sodium than zinc stearate. While tablets comprising low amounts of zinc stearate have only 1.7% degradation after two weeks while magnesium and calcium stearate resulted in 46.2% and 75.5% degradation over the same period of time with an identical percentage of lubricant. Since the prior art posits magnesium, calcium and zinc stearate as equivalents there would be no motivation to choose one over the other or to expect zinc to out perform the others. For these reasons the claims of the instant invention are patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Micah-Paul Young whose telephone number is 571-272-0608. The examiner can normally be reached on M-F 7:00-4:30 every other Monday off.
